

25 September 2026

DECLARATION OF RAW MATERIAL TRACEABILITY

To Whom It May Concern,

We  confirm, based on our production and shipment records, that the Matcha Premium delivered to our customer in Germany in January 2026 was produced using raw material from the same lot identified in the following Eurofins test report:

- **Laboratory:** Eurofins Dr. Specht International GmbH
- **Report No.:** AR-347-2026-00013644-01
- **Client sample code:** 25-303
- **Raw material lot No.:** 2025-12-10

The test report records that the pesticides screened in the submitted sample were below their respective reporting limits. Eurofins assessed the analytical results as compliant with Regulation (EC) No 396/2005 concerning maximum residue levels of pesticides.

This declaration confirms the traceability of the raw material used for the January 2026 delivery. The laboratory results relate to the sample submitted for testing.

Sincerely,
